P50297.A04

Title: Gaming table for use with gaming chips incorporating an electronic

Microchip

ABSTRACT OF THE DISCLOSURE

The A gaming table 10, for use with electronic memory microchip gaming

chips, includes a tabletop 12 including a gaming chip storage rack 22 and a test

station including a communication unit adapted to exchange information with the

memory of a gaming chip 25 in a test area 28 by way of an antenna device 29, the

communication unit being associated with a digital processing unit delivering an

output message to the screen 30 of a display device. The layout of the table 10-is

such that the screen 30 of the display device is physically separate from the casing

of the test station and the test area 28 and the screen 30 are disposed close together

on the tabletop 12, beside the rack 22 and in reach and in view of the operator 18.

The gaming table is usable in casinos and gaming rooms.

The gaming table is usable in casinos and gaming rooms.
